SAFETY NETTING

INDUSTRIAL PIT NETTING SYSTEMS

Fall hazards are a major concern when an opening in the floor is not properly protected. Pit Netting systems are a safe and effective solution specifically designed to suit your existing service bays and provide a reliable fall protection solution with minimal impact on day-to-day operations. Our Pit Netting design allows for easy movement of the netting and requires minimal modifications to the existing facility area.

Expect exceptional customer service with a response time under 48 hours and on-demand delivery.

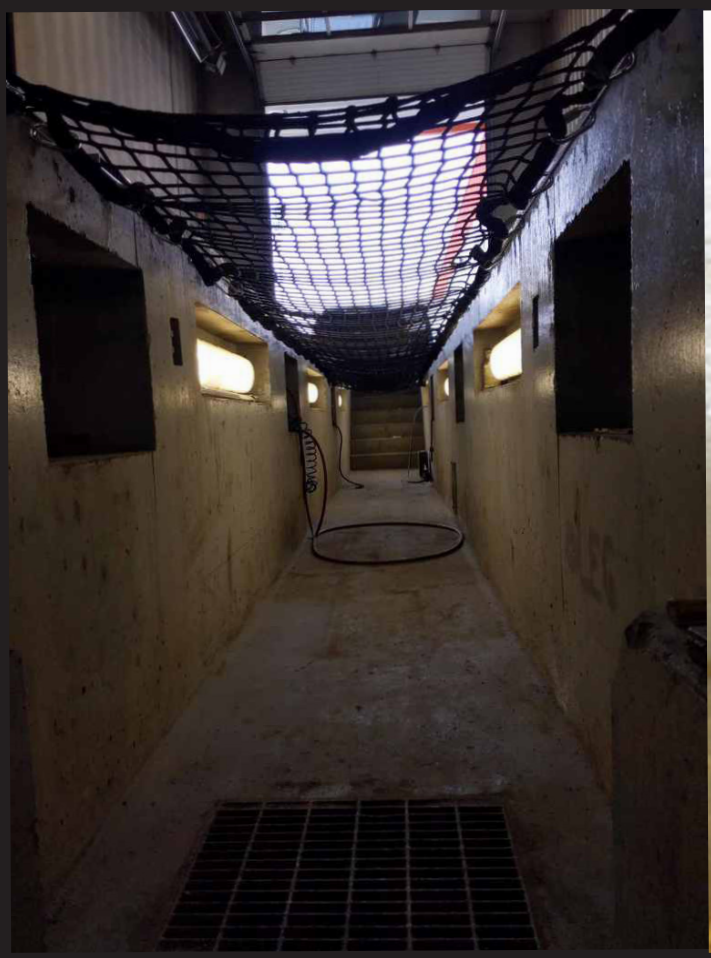
Meet multiple safety compliance needs with one customizable system at a competitive price.

Engineered systems that meet and exceed all specification and safety regulation requirements.

Protects employees and visitors from injury or death from falling incidents.

PIT SAFETY NETTING SYSTEM

An “engineered” system consisting of custom-fitted netting panels and rigging hardware.



SAFETY STANDARDS MET BY NETTING SYSTEMS

- OHSA — OHSA 12.10
- ANSI — ANSI A10.11
- NFPA — NFPA 701 Fire Protection
- FDA — FDA Approved

Slips, trips and falls are some of the leading causes of injuries that result in workers missing time at work. Preventing these injuries is a critical goal of every safe and healthy workplace, with the use of fall protection equipment. Our Pit Netting system allows for simple and easy fall protection when the area is not in use and requires minimal modifications to the existing pit. Our customized system provides reliable and safe fall protection for employees and ensures compliance with ANSI and Canadian requirements, eliminating the risk of expensive penalties.
