

SPECIFICATION SHEET

MEZZANINE NETTING SYSTEMS

Custom Mezzanine Netting Systems are designed to enhance safety when workers need to perform tasks on ladders close to mezzanines or when products are stored near the handrails. These netting systems provide a protective barrier to prevent items from falling over the edge, safeguarding workers below. The netting allows workers to safely access elevated areas without the risk of falling objects.

Each netting panel is custom-made to fit your mezzanine space precisely, and we offer various netting materials to meet different load requirements based on your facility's needs. By attaching the netting to the guardrails surrounding the mezzanine, you ensure an added layer of protection while maximizing workspace efficiency.

MEZZANINE NETTING SYSTEMS

An “engineered” system consisting of load-rated netting panels, custom brackets, and rigging hardware.

SPECIFICATION

DETAILS

Product Name	Mezzanine Safety Netting
Manufacturer	Liftsafe Fall Protection Inc.
